

Set-up for in class projects

- ☐ Sign up for [GitHub](https://github.com) [https://github.com]
 - Ask to get added to the Students 2015 team
- ☐ Go to [this repo](https://github.com/codeparkhouston/fall-2015) [https://github.com/codeparkhouston/fall-2015]
- ☐ Fork the repo to your account by clicking on the "Fork" button in the upper right hand corner
- ☐ Sign in with your GitHub account at [Cloud9](https://c9.io) [https://c9.io]
- ☐ In your Cloud9 dashboard, click on "Repositories" or [go here](https://c9.io/account/repos) [https://c9.io/account/repos]
- ☐ Click on "Clone to edit" for the repo that has your username in the box
 - Cloud9 will start making a copy of the code for you to code in!

Once that completes and you are reading this from your Cloud9 workspace,

- ☐ In the bottom box, run this code: `npm install`
- ☐ And then: `npm run update`

To view your own version of the site

- ☐ Click on `index.html` on the left sidebar to open it in the main file viewer.
- ☐ Click on the green "Run" button in the top center.
- ☐ Open a new tab and goto `http://fall-2015-your-username-here.c9.io/`
 - Congrats! That's yours!
